

— ENTERPRISE AI & PRODUCT ENGINEERING

Building **intelligent** enterprise systems that deliver impact.

DIATOZ designs, builds, and scales production-grade AI systems, digital products, integration platforms, and data-intensive enterprise software.

2018 FOUNDED	150+ TEAM MEMBERS	50 CASE STUDIES
49+ GLOBAL PARTNERS	1 AI PATENT	

Four pillars of enterprise excellence.

From strategy through production operations, DIATOZ combines product thinking, deep engineering, and accountable delivery.

The DIATOZ Way · Discover → Architect → Build → Secure → Scale → Optimize

01 / AI

AI & Generative AI

Private AI infrastructure, on-premise LLMs, copilots, document intelligence, RAG platforms, and predictive systems.

On-Prem LLM

GenAI Platforms

AI Copilots

Document AI

02 / PRODUCT

Product & Platform Engineering

SaaS products, enterprise platforms, cloud-native services, high-scale systems, mobile apps, and secure architecture.

Cloud-Native

Microservices

Real-Time

Secure by Design

03 / INTEGRATION

Enterprise Integration

API-led connectivity, Salesforce, MuleSoft and Azure integration, event-driven architecture, and workflow automation.

MuleSoft

Salesforce

Azure

Event-Driven

04 / DATA

Data & Decision Intelligence

Data platforms, streaming pipelines, IoT, operational analytics, dashboards, and intelligence for faster decisions.

Spark & Kafka

IoT Pipelines

Analytics

Decision AI

— INDUSTRY DEPTH

Built for complex, regulated, high-scale environments.

Our teams pair engineering depth with the operational context needed to ship systems that work in the real world.

Financial Services

Core banking, lending, payments, trading, insurance, and governed customer platforms.

Manufacturing & Engineering

Industrial intelligence, PLM, ERP, IoT, predictive maintenance, and smart operations.

Telecom & Network Security

Edge systems, network optimization, observability, and zero-trust security architectures.

Retail & E-Commerce

Multi-channel commerce, real-time inventory, fulfillment, and customer data integration.

Healthcare & Life Sciences

Secure data platforms, workflow automation, compliance, and patient-facing experiences.

Logistics & Supply Chain

Yard operations, fleet visibility, route intelligence, and warehouse management.

— OUR PRODUCTS

Products born from real enterprise problems.

Every product reflects firsthand delivery experience: structured around measurable workflows, enterprise control, and production realities.

FW

FlowWork.ai

FEATURED**AI-Powered Work Platform for Growing Companies**

One AI-powered workspace for strategy, execution, visibility, and confident scaling from 50 to 500+ employees.

Visit FlowWork.ai →

VA

Valtren AI

Supervisory Intelligence for Industrial Operations

Connects ERP, MES, CMMS, SCADA, and IoT signals to reduce recurring failures and accelerate root-cause analysis.

Visit Valtren AI →

e2e

e2eHiring

Jobs, Hiring & Recruitment

Brings job seekers and employers together through structured discovery, assessment, and recruitment workflows.

Visit e2eHiring →

FlowYard

AI-Powered Yard Management

Gives ports, logistics yards, and OEMs visibility into vehicle movement, slots, turnaround, and operations.

Visit FlowYard →

CoreBridz

Digitised Branch Banking, Connected to Your Core

Digitises counter forms, runs a live token queue, and connects to core banking with bilingual, on-premise AI.

Visit CoreBridz →

Veldox

Connected Intelligence for Two-Wheelers

Navigation, communication, and vehicle intelligence designed from the rider's seat and shipped under the maker's brand.

Visit Veldox →

TradeDesk

ML-Driven Trading Desk for Crypto Futures

Ranks a liquid crypto universe, executes a market-neutral futures book, and measures the real cost of every trade.

Visit TradeDesk →

Moduvio

PLM + Operational ERP Platform

Connects product definition and change control with supply, inventory, manufacturing, quality, finance, and reconciliation.

Visit Moduvio →

— SELECTED OUTCOMES

Evidence from production systems.

Representative engagements across AI, integration, financial services, Salesforce, data migration, and commerce.

**PRIVATE AI ·
MANUFACTURING**

On-Premise Open-Source LLM

A governed private-AI platform hosted on dedicated enterprise GPU infrastructure.

Zero external data exposure and no dependency on public LLM APIs.

[Read case study →](#)

BANKING · INTEGRATION

Real-Time Core Banking Integration

API-led and event-driven connectivity between legacy cores and Salesforce FSC.

60% fewer manual reconciliations and 40% less integration effort.

[Read case study →](#)

CLOUD · MODERNIZATION

MuleSoft to Azure Integration Services

Reworked always-on integrations into governed, event-driven Azure services.

50+ applications migrated from reserved capacity to usage-based services.

[Read case study →](#)

**SALESFORCE · DATA
MIGRATION**

Medical Admissions Migration

Structured records and documents moved through a reusable API-led architecture.

Six years of data migrated inside a 10-day cutover window.

[Read case study →](#)

COMMERCE · SALESFORCE

Multi-Storefront Ecommerce Backbone

Two-way synchronization across Salesforce, Magento, Shopify, and third parties.

One source of truth for customers, orders, inventory, pricing, and status.

[Read case study →](#)

LENDING · SALESFORCE

Unified Lending & Mortgage Transformation

Connected Salesforce, core banking, decisioning, mortgage, and campaign systems.

Loan decisions under five seconds and 479% more real-estate leads.
